Nonogram

Nonograms are picture logic puzzles where you fill or leave blank cells in a grid according to the numbers along its edges. The numbers indicate the length of consecutive blocks of filled squares in each row or column, with at least one blank square between groups. For example, a clue of "4 8 3" would mean there are sets of four, eight, and three filled squares, in that order, with at least one blank square between the sets. Although the solution reveals a hidden image, the picture isn't actually helpful for solving, and can mislead you into guessing. If guessing is used, a single error can spread over the entire field and completely ruin the solution, so don't guess!

									1											
								1	1				5	3		2			2	
							1	2	2	3	3	5	1	5		2	7	8	1	
						2	3	2	2	5	5	4	1	3	12	4	4	2	1	3

		1	1	2	2															
				3	5															
				3	5															
				5	4															
			5	1	1															
			3	5	3															
					12															
			2	2	4															
				7	4															
				8	2															
			2	1	1															
					2															

Sudoku

Sudoku is a logic puzzle played on a 9x9 grid divided into nine 3x3 boxes. You fill each row, column, and box with the numbers 1 through 9 so that no number repeats within any of them. Every number must appear once in each row, column, and box. Once again, the challenge is to use reasoning, not guessing, to fill all 81 squares correctly.

1	3	7	9		6	8	4	2
5	8			4			7	6
4		2				5		9
			1	2	3			
	2		8		4		3	
			7	6	5			
9		3				6		4
6	5			7			2	3
2	4	8	6		9	7	5	1
